

A Solution to Tackle Any Challenge: Red Lion's Versatile FlexEdge™ Controller

Available from PRIME

Introducing FlexEdge™

All the potential of IIoT.
All the capability
you need.
All the versatility you
could ask for.
All in one device.

One platform. Millions of configurations. Limitless potential

Custom design to exact specs using the FlexEdge™ Builder. Field installable sleds mean that your organization can instantly leverage new technologies as they become available.

Flexible. Future proof. Feature-packed

A single controller packs a ton of features into a compact package, providing the flexibility needed to solve nearly any networking or automation challenge. What's more, it's been designed to accommodate the future. FlexEdge™ makes technological obsolescence virtually obsolete.

Rugged outside. Reliable inside. Genius from every angle.

Rugged construction, industrial certifications, built-in web server and Red Lion's Crimson® software provide a single, dependable solution for control, networking and data visualization in even the harshest environments.

Massively scalable. Effortlessly deployable

Start small or start big. Either way, as needs change and it comes time to scale, do it effortlessly by adding up to ten I/O and PID modules. And because modules are field installable, the system can grow while minimizing downtime. This is edge computing taken to a whole new level of versatility.

Plug and play. And plug. And play

Effortlessly stack any number of I/O and PID modules—up to 10 total—thanks to a form factor that adapts to your needs and application. It's quick, easy and designed to boost any bottom line.
